

Project Status Report

Project Name

SSCF Resource Hub

For Week Ending

March 23, 2025

Project Status

Yellow

Status Description

We are currently in the yellow range because the past two deadlines we have struggled as a group to complete the tasks in a punctual manner. Communication could be improved because at times we have not planned ahead before meetings. Additionally, time management can be improved.

In order to bring the project back to the green status we plan on:

- Starting tasks ahead of time
- Meeting more frequently
- Communicating our needs more effectively

Activities—During the Past Week

Olly - Worked on the home and about pages

Fairuz - Worked on the resources page

Luka - Worked on the events page

Ebele - Worked on the storytelling and networking pages

Activities—Planned for Next Week

Everyone works on their respective pages on WordPress. Focus on getting the MVP implemented. Once that has been completed, we can work on higher level design aspects such as animations and interactive features.

Project Issues

1. During initial usability testing, users struggled to find relevant resources once inside the “Resources” section. Too many ways to switch between pages caused confusion.
2. Category names on the resources page were expected to be clickable.
3. Users expected the story-telling section to provide guides on writing stories.
4. The description on the resources page was ambiguous.

Project Changes

Design Changes:

- Resources page changed to be less pages; Mobile resources page is different
- Events page—complete redesign
- Change to more meaningful text in prototype across certain pages
- Use of SSCF images as opposed to random stock images
- Shorter Landing page
- Addition of storytelling workshop page

Layout Changes: (can make changes to site map)

- Events page reduced to one page
- Added Storytelling page

WordPress Page Changes:

- Added title to main page
 - Moved search to a more intuitive position in the top right of the page
 - Will add link back to SSCF page on about page
 -
-
